Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 1-20 are pending in the application for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1-4 and 10-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Coffey (US Pat No. 6,364,535).

Regarding claim 1, Coffey teaches a telecommunications device (e.g., media converter) comprising:

a housing (e.g., housing assembly 10 of Fig 1) adapted to removably receive a telecommunications equipment module (see Figs 1-3 and col. 2, ln 53-col. 3, ln 30); and an adapter plate (e.g., plate 220) removably connected to the housing (e.g., housing assembly 10 of Fig 1), the adapter plate (e.g., plate 220) including structure (e.g., holes 224s) for mounting the adapter plate to a wall (see Figs 1 and 12; and col.4, lns 19-24).

Regarding claim 2, Coffey teaches the telecommunications device of claim 1, wherein the structure for mounting the adapter plate to the wall includes a plurality of mounting openings (see Fig 12 and top and bottom holes 224s).

Regarding claim 3, Coffey teaches the telecommunications device of claim 1, wherein the telecommunications equipment module includes an electrical-to-optical and optical-to-electrical signal converter (see col. 3, Ins 48-57 and col. 4, Ins 57-64).

Regarding claim 4, Coffey teaches the telecommunications device of claim 3, wherein the housing includes a first end and an opposite second end, wherein the signal converter is mounted in the housing and includes fiber optic connectors located at the first end of the housing, and wherein the housing includes coaxial connectors located at the second end of the housing that are electrically connected to the signal converter (see Figs 10 and 14-15 and col. 3, In 63-col. 4, In 56).

Regarding claim 10, Coffey teaches the telecommunications device of claim 1, wherein the housing includes top and bottom sides, and wherein the housing includes top and bottom rails that project respectively above and below the top and bottom sides of the housing (see Fig 1).

Regarding claim 11, Coffey teaches the telecommunications device of claim 1, wherein the housing is configured to receive only a single optical-to-electrical and electrical-to-optical converter (see col. 3, Ins 48-57 and col. 4, Ins 57-64).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Coffey '535.

As to claim 12, the telecommunications device must be complied with level 3 NEBS requirements would be obvious for quality, reliability and safety purpose.

Allowable Subject Matter

7. Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 13-20 are allowed.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art in general:

U.S. Pat. No. D449,300

U.S. Pat. No. D451,479

U.S. Pat. No. 4,595,839

U.S. Pat. No. 6,201,920
